

WHAT IS CLAIMED IS:

- 5 1. A location relevant server system comprising:  
a server receiving information indicating a location of a  
mobile communication device, the server being connected to a  
network;  
memory accessible to the server, the memory being associated  
10 with a mobile communication device, the memory storing  
information relating to a user of the mobile communication  
device, the memory including data concerning the location of the  
mobile communication device and data concerning establishment of  
communication with the mobile communication device;  
15 wherein the server executes a program allowing access to the  
memory storing information relating to the user of the mobile  
communication device, the program allowing different people  
different access to the memory based on the identity of the  
user.  
20
2. The location relevant server system of claim 1 wherein the  
memory stores e-card information.
3. A method of providing contact information regarding a user,  
25 the method comprising:  
allocating a user-specific space in memory accessible over  
a computer network to a specific user;  
associating a mobile communication device with the user;  
determining a location of the user by receiving location  
30 information provided by a mobile communication device;  
storing data indicative of the location of the user in the  
user-specific space;  
receiving additional data regarding the user;  
storing the additional data regarding the user in the user-  
35 specific space;

1 42254/DMC/C685

receiving an access list of possible requesters of the data  
in the user-specific space;

5 providing the data indicative of the location of the user  
and the additional data regarding the user to possible requesters  
on the access list.
